Intelligence, Electronic Warfare & Sensors

Lt. Col. Craig Cotner
Chief of Concepts Fires, CDID

PEO IEW&S AI / ML & SW Development MATOC

SEPTEMBER 10, 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

Kim Nugent
Contract Planning Division Chief

- **PEO IEW&S** has identified a need for rapid contract awards in the areas of **Artificial Intelligence / Machine Learning (AI / ML)** and **Software (SW) Development**
 - **PM IS&A Project Linchpin** support
 - **PM EW&C SW Development** support for Electronic Warfare (EW) re-programming efforts
- Other **SW Development** as required
- Award large **MATOC** (est. value ~\$1B) in late 4QFY25
- Award Task Orders / Delivery Orders (TOs / DOs) under \$25M targeted awards in 30 days

- **MATOC** to contain language for support of majority of **PEO** programs
 - Launch of **MATOC** would see two (2) vendor pools initiated:
AI / ML & SW Development
 - Vendor pool sizes and set asides currently being evaluated and additional information will be released in the future
 - Use of sub-pools is anticipated to focus on particular areas of interest
 - Ability to create additional vendor pools in other technical areas as required
 - Support a “fail early and pivot” strategy
 - Contain strategies for streamlining awards as well as the transition efforts should a contractor prove to be unsuccessful
 - Use of templates where possible to streamline awards
 - Increased access to program team
 - Ability to rapidly pivot to next awardable but not selected vendor
 - Shorter PoPs to encourage continual competition

- **MATOC** would be modeled around the idea of low barrier to entry for industry
 - For **MATOC** base awards – Government would not require lengthy proposals and maximize use of templates when possible
 - Government looking to leverage potential sample challenge/task for base awards
- Post award of base contract, the Government is exploring the idea of a continuous on-ramping window or potential quarterly reviews of potential new **MATOC** holders
 - New awardees will be brought on as both technology changes and requirements evolve within IEW&S

- Conducted one on one interviews with industry on 20 and 22 August to gain feedback on innovative approaches for speed and agility
- Industry feedback included:
 - Direct access to program teams early and often
 - Alpha contracting processes wherever possible
 - Leverage templates and forms when possible
 - Increased Government transparency on available budgets
 - Government to forecast future requirements for planning
 - Incorporate Government/vendor portal for communication and management of MATOC
 - Remove extraneous factors from TO award process

- Draft RFP anticipated for release 1QFY25
- **TENTATIVE** – Hybrid in-person/virtual industry day planned for early 2QFY25
- Final RFP for base award 2QFY25
- Government is targeting 4QFY25 award of base **MATOC** and first TO(s)

**ALL DATES SUBJECT TO CHANGE,
PROVIDED FOR PLANNING PURPOSES ONLY**

PM EW&C Signals of Interest

SEPTEMBER 10, 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

Paul Dangelantonio
Chief Acquisitions and Contracts

Desired Vendor Arena

- Technical Engineering support for software support, development, test and operational use of Artificial Intelligence (AI) and Machine Learning (ML) techniques and capabilities as applied to the functional areas SIGINT and Electromagnetic Warfare (EW) Capabilities across all domains (Land, Sea, Air, Space) for the U.S Army.
 - SIGINT and EW capabilities include but are not limited to : Deception, Disruption, Denial, Degradation, and Destruction, commonly known as the “Five Ds,” are the possible desired effects when targeting an adversary’s capabilities.

Potential Future Requirements

- Ability to collect RF Spectral data (commercial or otherwise), label store, warehouse, and protect.
- Ability to create AI/ML algorithms/models in pursuit of SIGINT and EW functions.
- Ability to train, test, and evaluate relevant models and fine tune models based on new or evolving data sets.
- Ability to detect spoofing and data poisoning, counter adversarial learning.
- Ability to create new exploitation, spoofing and obfuscation techniques at a rapid pace in support of Program of Records Reprogramming Activities.
- Ability to support operations and predictive maintenance.

Project Linchpin

SEPTEMBER 10, 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

Major Rosa
Assistant Project Lead

Recruiters
Linchpin / DoD Partners
"Agile Contracting"

Training & Test Facilities
"AI Gymnasium"

Delivery & Feedback

High-Demand Customers
"PEOs / PMs / Operational Users"

Coaches & Trainers
"Linchpin & AI Tech Services"

Rules & Standards
"TORC Tenants"
"V&V Standards"

Linchpin Infrastructure

Equipment Managers
"AIOps+ Tools / CICD"

Beverage Service
"Data Environment"

Parking Lot for Easy Access
"Industry Ecosystem"

Security & Enforcement
"TORC Tenants / AI BoM"

Central / Customer Funding & Investment

The Analogy – Playing the “Game” of AI

Project Linchpin delivers infrastructure, tools/technologies, standards, process that allows AI to “play the game”

- Rapid on/off ramp procedures to maintain competition, innovation, relevancy, and performance
- Areas of Special Interest to support Artificial Intelligence Operations and Services (AIOps +) (Sub-pools)
 - AI Consulting
 - Data Services
 - Test and Evaluation
 - Model Development and Training
 - AI Use Case Design
- Additional areas of interest to be identified as Linchpin matures

PM Cyber & Space (C&S)

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- Federated Hyperconverged Infrastructure (FHCI)
 - White papers are under review
- Systems Engineering & Technical Assistance (SETA)
 - Draft documents to be released Oct 2024
 - Request for Proposal, anticipate release Dec 2024

PM	Contract Description/POC Info	Estimated Value	FY 2024				FY 2025				FY 2026				FY 2027				
			Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	
C&S	Action is for the development of Federated Hyperconverged Infrastructure (FHCI) prototypes. A hyperscale computing prototype using a modern Modular Open Systems Approach (MOSA) for integrating microservices in edge, fog, and cloud resources to implement a Federated Hyperconverged Infrastructure (FHCI) that provides a secure environment for execution of complex, high priority, distributed operations. PM POC: Wendy Knapp, wendy.b.knapp.civ@army.mil KO: Oral Grant, oral.g.grant.civ@army.mil	\$25,000,000 - \$35,000,000																	
C&S	Effort is a 5-year SETA Contract to support PM Cyber & Space under RS3. Provide acquisition services to include technical, engineering, acquisition, program management, operational, security, logistics, administrative, financial, contract planning and business support services in order to meet PM C&S mission requirements. PM POC: Wendy Knapp, wendy.b.knapp.civ@army.mil KO: Oral Grant, oral.g.grant.civ@army.mil	\$85,000,000 - \$125,000,000																	

PM Electronic Warfare & Cyber (EW&C)

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- Spectrum Node TLS Remote Evaluation (SNTRE) OTA – Awarded to 3 vendors in Aug 2024.
- DevSecOps Follow-On – Still remains in source selection. Estimated Award date: November 2024.
- FY 26 New Start Program - Modular Electromagnetic Spectrum System (MEMSS) – Working to define requirements.
- FY 27 New Start Program - NAVWAR Electronic Attack System Overhead (NESO) – Working to define requirements.

- Integrated Product Support Sustainment for Tactical Integrated Ground Suite (TIGS) – New effort added, currently working on Requirements Package, estimated award: July 2025.
- Counter Surveillance Reconnaissance Prototyping – New effort added, currently conducting Market Research. Projected Industry Day is November 2024.
- Tactical Integrated Ground System Production - New effort added, currently conducting Market Research. Projected timeframe of Industry Day is November 2024.

PM	Contract Description/POC Info	Estimated Value	FY 2024				FY 2025				FY 2026				FY 2027					
			Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4		
EWC	DevSecOps Software Support: Competitive Task Order on the RS3 contract in support of maintenance, production fielding support, and future deployment of Government owned software. Task Order is planned for a 5 year period of performance with 1 base year and 4 option years. Effort is to award to a software (SW) partner who will operate a continuous integration and continuous development (CI/CD) software pipeline through an established DoD cloud service provider. This CI/CD pipeline will be utilized for a Signals Intelligence (SIGINT), Cyber, and Electronic Warfare (EW) technologies and systems by utilizing commercial best practices for software development that centers on stakeholder involvement, Agile software development using the Scaled Agile Framework (SAFe) methodology, DevSecOps, and microservices architecture. ACC APG POC: Oral Grant, PM POC: Mark Stillwagon	\$43,000,000 - \$53,000,000																		
EWC	Modular Electromagnetic Spectrum System (MEMSS) is an Electromagnetic Warfare (EW) capability with the intent to effect adversary sensors. It includes manipulative, simulative, and imitative altering of the Electromagnetic Spectrum (EMS) to place the adversary at a disadvantage.	\$130,000,000 - \$170,000,000																		
EWC	NAWWAR Electronic Attack System Overhead (NESO) is a lightweight and modular Navigation Warfare/Electronic Warfare system designed for carriage on a High-Altitude Platform. NESO will penetrate into Anti-Access/Area Denial (A2AD) bubbles in "Competition and Conflict" to sense, deny and manipulate adversary Positioning, Navigation and Timing (PNT), Command and Control (C2), Communications, and other Electromagnetic Spectrum (EMS) enabled services. ACC APG POC: Chris Gaines, PM POC: John Couvaras	\$120,000,000 - \$160,000,000																		

Integration Directorate

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- Currently in the source selection phase of the procurement of the Digital Engineering Ecosystem.

PM	Contract Description/POC Info	Estimated Value	FY 2024				FY 2025				FY 2026				FY 2027			
			Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
			Integration Directorate	The work for this RS3 task order will include contractor services that support the instantiation of a Digital Engineering Ecosystem (DEE) for Program Executive Office Intelligence, Electronic Warfare & Sensors (PEO IEW&S). The DEE will consist of common digital engineering tools, collaboration software, integrated digital threads, and compute & store space in a Government owned cloud environment. A DEE is a new capability and system that has not been previously established within PEO IEW&S. The contractor providing support services for this contract will consist of Research, Development, Test and Engineering (RDT&E); Engineering Services; and Training Services.	\$5,000,000 - \$11,000,000													

PM Intelligence Systems & Analytics (IS&A)

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- Weather Operational Effects (App 3), Awarded 4 JUN 2024
- Information Collection Management (App 4), Awarded 31 JUL 2024
- Data Collection, Reduction and Analysis action cancelled; will be restructured
- Geospatial Intelligence (App 5) is deferred pending requirements determination
- Signals Intelligence (App 6) is deferred pending requirements determination

PM Positioning, Navigation & Timing (PNT)

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- NorthStar's TMRR effort has been removed to focus on the prototyping effort.
- NAVWAR SA RFI release planned for October 2024
- The Block 2 CMFF effort has been added for the redesign of the APNT card to reduce costs, mitigate supply chain risk management issues, and incorporate bug fixes. Award is forecasted for 1QFY26.
 - Request for Information (RFI) under Notice ID, W56KGY-24-PNTMOD-0002, was released by ACC-APG on 19 August 2024. Responses from Industry are due by COB on 19 September 2024.

PM	Contract Description/POC Info	Estimated Value	FY 2024				FY 2025				FY 2026				FY 2027					
			Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4		
PNT	Product Support Services (PSS) and field support services for PM PNT new or existing hardware and software products. Utilizing RS3 small business suite. PM PNT: Paul Davis, paul.m.davis14.civ@army.mil KO: Aaron Kazi, (443) 861-4765, aaron.h.kazi.civ@army.mil	\$116,000,000 - \$156,000,000																		
PNT	Block 2 CMFF - Redesign of APNT card for cost reduction, mitigate supply chain risk management issues, and to incorporate bug fixes. Factoring integration support to PM Mission Command (MC). PM POC: Amy Short, amy.l.short.civ@army.mil KO: Charles Compton, charles.d.compton5.civ@army.mil	\$42,000,000 - \$52,000,000																		
PNT	NAVWAR SA is a system of systems solution that ties together applications, systems, and Soldiers necessary to sense areas of PNT denial, analyze mission impact, and communicate those impacts for mission planning and execution. Fusion of sensors provide a comprehensive and in-depth common operating picture of electromagnetic spectrum access to PNT information across all and warfighting domains. PM POC: Kristen Riesett, kristin.m.riesett.civ@army.mil KO: TBD	\$89,000,000 - \$109,000,000																		
PNT	NorthStar is the next generation mounted capability for fielding Army 2030/2040. Focus is on affordability through reduced integration costs, government architectures and standards that facilitate modularity while providing tiered capability solutions. PM POC: Joseph Stevanak, joseph.t.stevanak.civ@army.mil KO: Charles Compton, charles.t.compton5.civ@army.mil	\$44,000,000 - \$64,000,000																		

PD Sensors-Aerial Intelligence (SAI)

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- PD SAI released a Task Order Request (TOR) under the Responsive Strategic Sourcing for Services (RS3), reference RS3-24-0020, for the Project Director Sensors-Aerial Intelligence (PD SAI) Systems Engineering and Technical Assistance (SETA) Support contract. Proposals have been received and the Government is in evaluation. On Track for a 1QFY25 award.
- SOCOM Tactical Airborne Multi-Sensor Platforms (STAMP III) Follow-On Operations and Support contract action, reference RFI # RS3-24-0029, has been CANCELED.

- PD SAI released a Request for Information (RFI) seeking information from industry to revalidate sources for sustainment and engineering services related to the Long Range Radar-Enhanced (LRR-E) P/N NP302K600G03 developed by Northrop Grumman Systems Corporation, Cage Code: 15055. Responses due 1:00PM ET on 16 October 2024.
- PD SAI released a Request for Information (RFI) seeking information from industry for Small Form Factor (SFF) ELINT, COMINT, and RADAR sensor technologies for micro High Altitude Balloons. Responses were due 4:00PM ET on 22 July 2024. The Government is currently reviewing received information.

PM	Contract Description/POC Info	Estimated Value	FY 2024				FY 2025				FY 2026				FY 2027			
			Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
SAI	New PD SAI SETA support follow-on. Scope includes requirements to provide technical, engineering, acquisition, program management, operational, security, logistics, administrative, financial, contract planning and business support services in order to meet PD SAI mission requirements. POC: Jesse Lefever, jesse.l.lefever.civ@army.mil	\$90,000,000 - \$130,000,000																

PM Terrestrial Sensors (TS)

SEPTEMBER 2024

Program Executive Office
Intelligence, Electronic Warfare & Sensors

- PD Aerostats MATOC IDIQ –Award will be made under the authorities provided by Section 1244 of the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023, as amended by Section 1242 of the National Defense Authorization Act for Fiscal Year 2024 – Temporary Authorizations for Covered Contracts Related to Ukraine, Taiwan, and Israel, dated 12 Mar 2024.
- Aerostats SETA, PdM BIO PMOSE, & IBD-SS are still in Source Selection.

PM	Contract Description/POC Info	Estimated Value	FY 2024				FY 2025				FY 2026				FY 2027				
			Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	
TS	PD Aerostat SETA HQ Support provides for the following services: Engineering & Technical support, Product Support Management, Business & Financial Management, Operations & Program Management in support of PD Aerostats and Aerostat Programs PM COR- Neal Dedicatoria, neal.h.dedicatoria2.civ@army.mil ACC APG POC- Jennifer Mattessino, jennifer.l.mattessino.civ@army.mil	\$65,000,000 - \$85,000,000		■															
TS	PdM BIO Project Management, Operations, and Systems Engineering (PMOSE) Support. Consolidation of PLEAC and PMOS Task Orders. PdM BIO POC: Jessica Carter, jessica.l.carter72.civ@army.mil, ACC-APG Belvoir POC: Ms. Alexis Williams, alexis.r.williams.civ@army.mil	\$43,000,000 - \$53,000,000			■														
TS	PM FPS- Integrated Base Defense Sustainment Support (IBD-SS) Product Manager Force Protection Systems (PM FPS) and Product Manager Ground Sensors (PM GS) have requirements for comprehensive training, contractor logistics, operator, and sustainment support services, to include material procurement, for equipment and capabilities in the contiguous United States and outside the contiguous United States. PM FPS POC: Mr. Summerlin Walker, summerlin.s.walker.civ@army.mil, ACC-APG Belvoir POC: Ms. Jessica Wright, jessica.l.wright106.civ@army.mil	\$460,000,000 - \$540,000,000			■
