

PEO IEW&S

Program Executive Office Intelligence, Electronic Warfare, and Sensors delivers sensors as well as processing, exploitation, and dissemination systems dedicated to providing decision dominance. With a team of eight project managers located at Aberdeen Proving Ground, Maryland, Fort Belvoir, Virginia, Redstone Arsenal, Alabama, and within the National Capital Region the PEO for IEW&S leads a team of Soldiers, DoD Civilians and contractors in fielding systems that cover the gamut of military needs.

PEO IEW&S is a key enabler for Multi-Domain Operations as the organization sits at the cross-roads of multiple Army modernization efforts. Due to the PEO's extremely diversified portfolio, it supports a wide-range of organizations throughout the Army, as well as Joint partners.

Originally established in 1987, PEO IEW&S has supported operations throughout the world ranging from Operations Desert Storm/Desert Shield, Enduring Freedom and Iraqi Freedom, to current European Command efforts.

PEO IEW&S is delivering more than 85 Programs of Record and Quick Reaction Capabilities. Utilizing constant contact with users in the field, the team ensures currently fielded systems meet the operational demands of today with an eye toward the needs of the future.

See First Sense Deep Act Smart

MISSION

Deliver capability now through affordable and adaptable programs that pace the threat

VISION

Outpace the threat with technical excellence, adaptability and rapid solutions that support a broad range of operating environments

Deliver Decision Dominance

FOR MORE INFORMATION

Program Executive Office
Intelligence, Electronic Warfare & Sensors

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

Develop computer systems that are able to perform tasks that would normally require human intelligence. Help PEO IEW&S build an operations pipeline for creating AI/ML solutions for sensing and data science, lightening soldier's sensing, targeting and intelligence surveillance, and reconnaissance environments.

OFFENSIVE & DEFENSIVE CYBER

Protect PEO IEW&S information systems and networks from potential attacks, implement security measures and protocols to safeguard an organization's digital assets, preemptively identify security vulnerabilities, and actively test the network's defenses to provide valuable insights into an organization's cybersecurity posture.

ENGINEERING

Design and develop hardware and software applications critical to the organization's mission. Develop new methods of automated programs and test technology for the advancement of state-of-the-art systems.

BUSINESS & FINANCIAL MANAGEMENT

Balance and reconcile program requirements with available resources. Plan, organize, and facilitate payroll operations for PEO IEW&S.

SCIENCE & TECHNOLOGY

Work with experts to enhance existing capabilities and identify and determine the feasibility of new technologies through the use of models, simulators, and prototypes.

PROGRAM MANAGEMENT

Manage the development, acquisition, testing, product improvement, fielding, and sustainment of PEO IEW&S products.

LOGISTICS

Plan the integration, coordination, analysis and evaluation of the acquisition, fielding, and sustainment of Army equipment.

TEST & EVALUATION

Lead the coordination of test plans, methods, and events across multiple organizations to verify and validate system functionality and ensure PEO IEW&S fielded systems meet the operational requirements.

INFORMATION TECHNOLOGY

Manage the installation, administration, and configuration of application software and operating systems. Utilize your knowledge of technology trends to resolve hardware, software, security, communication, and networking issues.

HUMAN CAPITAL

Deliver a best-in-class employee experience and assist the organization in attracting, retaining, and developing talent.

BENEFITS

- **Competitive Salaries**
 - 26 Pay Periods a Year
 - Work-Life Balance
